## About Me

Proven ability to establish effective solutions to all problems. Able to effectively self-manage during independent projects, as well as collaborate as part of a productive team

I started my journey as a graphic designer in the start of **2019** and learn many things about it. I started to learn **Adobe Illustrator** and **Adobe Photoshop**. Then I learn about **logo designing**. I try to make some but I was able to sell just one but I never stopped struggling. In **2022** an interest of **Computer Repairing** arose inside me then I found a shop in my area and learn computer repairing from that shop. After my Intermediate in **2023** someone suggested me to learn web development. I researched about it and then join a course provided by an institute **Gamica Cloud**. I completed it and it was a good course. I learn many languages and practiced a lot.

## Education

Matriculation
